LinkedIn: linkedin.com/in/joseandresvalenzuelamolina

PROFESSIONAL SUMMARY

Data & decision analytics professional with 5+ years of experience across banking, fintech, and healthcare, specializing in credit decisioning, business-rule translation, data modeling, KPI governance, and business intelligence. Experienced in translating business and risk requirements into analytical and decisioning solutions using SQL, Python, Databricks, DMN/Kogito, and Power BI. Strong track record working between business stakeholders and technical teams across advanced analytics, data warehousing, and AI-related initiatives.Academic interests include applied data science, machine learning, data engineering, quantitative risk modeling, decision systems, and responsible AI.

EDUCATION

The University of Texas at Austin — McCombs School of Business
Postgraduate Program in Data Science and Data Management Systems | 2023
GPA: 4.0/4.0

- Python for exploratory data analysis and data preparation using pandas and NumPy.
- SQL development using DDL, DML, views, and stored procedures.
- Distributed data processing using PySpark and Spark SQL.
- ETL orchestration using Apache Airflow on GCP Cloud Composer.
- **Capstone Project:** Developed a cloud-based data analysis system for real-time monitoring of oxygen saturation and heart rate in intensive-care patients.

Universidad de San Carlos de Guatemala — School of Engineering
Bachelor's Degree in Chemical Engineering | 2020
Overall average: 75/100 | Class rank: 15/75
Quantitative foundation in mathematics, statistics, hypothesis testing, process analysis, and data modeling applied to chemical and industrial systems.

PROFESSIONAL EXPERIENCE

Digital Credit Risk Coordinator – Credit Decisioning
Corporación Banco Industrial - Zigi App | Banking & Fintech | Guatemala
May 2026 – Present

- Drove the migration and production implementation of the **decisioning model for digital collections**, transitioning legacy versions to a newly proposed architecture and logic to the redesigned framework.
- Bridge credit-risk requirements with technical implementation, helping ensure traceability between policy definitions, data inputs, business rules, and decision outcomes.

Business Translator – Advanced Analytics
Corporación Banco Industrial - Zigi App | Banking & Fintech | Guatemala
September 2024 – April 2026

- Translated business requirements into analytical specifications, data rules, KPI definitions, and reporting requirements for data and analytics teams. Standardized **40+ business KPIs**.
- Worked extensively with the Databricks ecosystem: SQL, Python, Apps, Genie, and Metric Views.
- Contributed to the launch of the company's internal AI assistant through business-rule governance.

Senior Business Intelligence Analyst — Business Intelligence
Banco CHN | Banking | Guatemala
December 2023 – September 2024

- Developed BI solutions for Credit Card and Portfolio areas using Power BI.
- Built analytical and operational dashboards supporting management and audit requirements, including data consumption through Streamlit.

Statistical Coordinator - Business Intelligence
Corporación Banco Industrial - La Paz Grupo Hospitalario | Healthcare | Guatemala
June 2022 – December 2023

- Designed ETL pipelines and analytical dashboards to monitor commercial, and healthcare KPIs.
- Analyzed surgical drug utilization and anesthesia timing across providers, drugs, and temporal trends.

Business Intelligence Trainee - Business Intelligence
Luminova Pharma Group | Pharmaceutical & Life Science | Guatemala
January 2022 – March 2022

- Developed an end-to-end ETL solution using external pharmaceutical market data from Close-Up Audit.

SELECTED PROFESSIONAL DEVELOPMENT

DATABRICKS

Data Engineer Associate Certificate | In Progress
Data Warehousing Track | 2025 | Data Warehousing, Advanced SQL Programming and Data Modeling

INCAE BUSINESS SCHOOL

Business Intelligence Professional Program | 2023
Business intelligence strategy, KPI definition, analytics, and BI roadmap development.

MIT PROFESSIONAL EDUCATION

Applied Data Science Program | 2022
Applied machine learning, unsupervised learning, recommender systems, deep learning, statistical modeling, and time-series analysis using Python. **Capstone Project:** Developed ARMA and ARIMA models to forecast carbon emissions using natural-gas data, including stationarity analysis, decomposition, and RMSE evaluation.

AWARDS

Employee Award — Zigi App | April 2026
Recognized for contributions to the launch of the company's internal AI assistant, including business-rule governance, data-source definition, and output validation.

Outstanding Employee Award — Corporación Banco Industrial
Three-time recipient: December 2022, December 2024, September 2025.

Full Scholarship — American School of Guatemala
High School Program | 2011–2013

TECHNICAL SKILLS

Programming & Data: SQL, Python, PySpark, Excel
Data Platforms: Databricks, SQL Server, MySQL
Data Engineering: Data Warehousing, ETL/ELT, Apache Airflow
Analytics & BI: Power BI, Tableau, KPI Design, Data Modeling
Decision Systems & Risk: Credit Decisioning, Credit Risk Analytics, DMN, Kogito, Business Rules, Truth Tables
Development & Cloud: Git, GitHub, Streamlit, GCP Cloud Composer
Data Science: Regression, Classification, Clustering, Time-Series Analysis, Machine Learning, Statistical Testing

SELECTED PROJECTS

Digital Credit Decisioning & Collections — Banco Industrial
Migration and production implementation of a Kogito-based decisioning model for digital collections.

Real-Time ICU Monitoring — University of Texas at Austin
Cloud-based analytical system for monitoring oxygen saturation and heart-rate measurements.

Carbon Emissions Forecasting — MIT Professional Education
ARMA/ARIMA time-series modeling applied to natural-gas and carbon-emissions data.

LANGUAGES

Spanish: Native
English: C1 (CEFR) | TOEFL iBT: **100/120**, August 2026
